The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/577,708	Applicant(s) LEONINI, LUCIANO	
	Examiner Árpád Fábián-Kovács	Art Unit 3671	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Drawings

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: stemmer 6' disclosed in starting with ¶50. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The disclosure is objected to because of the following informalities: page 11, ¶56, last line "Figure 11)" should be -- Figure 11 --.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2, 7-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 3671

In re cl. 2: in the phrase “**other** undesirable waste” the word “other” is indefinite, the metes and bounds of the claim cannot be determined.

There is insufficient antecedent basis for these limitations in the claim(s):

cl. 2: “said rough harvest.”

In re cl. 16: “Harvesting machine” is confusing, it is unclear if the applicant refers back to the “harvesting machine” recited in the preamble of the parent claim.

In re cl. 17: it is unclear what the “thereof” refers to; the second recitation of "harvest collection tipping bowls" is confusing, if it is the same as in claim 16, than either "the" or "said" should be used.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2, 10-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Garza, Jr (5480353).

cl. 2: de-stemming device comprising:

extractor system (conveyor belt 14 or 64);

stemmer (drum with fingers 60);

cl. 10: the extractor system (64) installed parallel to the supply direction & at angle (see fig 6);

cl. 11: the stemmer is perpendicular to the extractor (see fig 6);

Art Unit: 3671

cl. 12-13: transporting means / auger (belt 14, see fig 7) from an outlet of the extractor (64) to an inlet of the stemmer;

cl. 14: the extractor system & stemmer placed one after another in a horizontal or generally horizontal position (see fig 6-7).

As applied to claim(s) 1, in view of the structure disclosed/taught by Garza, the **method** of operating/using the device is inherent since it is the normal and logical manner in which the device is used.

Allowable Subject Matter

Claim(s) 3-6 is/are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 7-9, 15-17 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See form 892.
